DATA PROCESSING AGREEMENT (DPA)

This Data Processing Agreement ("DPA") is entered into between:

Client (Covered Entity):
_____

Authorized Representative:
_____

AND

Service Provider:
Muhammad Umer
(EaseWorkflow)

Effective Date: _____

---

1. PURPOSE

This Agreement defines the terms under which operational and healthcare-related data is processed through automation systems developed for the Client.

The goal is to ensure secure, efficient, and controlled data handling within workflow automation processes.

This Agreement applies to all current and future data processing activities performed by the Service Provider for the Client.

---

2. DATA PROCESSING SCOPE

The Service Provider may process data strictly for automation purposes, including:

• Retrieving patient and appointment data via Client-approved APIs
• Processing workflow actions (e.g., appointment creation, updates)
• Executing browser-based automation tasks
• Supporting system synchronization between platforms

---

3. DATA FLOW AND LIFECYCLE

Data processing follows a minimal-retention model:

• Data is temporarily loaded during execution
• Intermediate processing files may be created for workflow handling
• Data is deleted immediately after successful processing
• Only non-sensitive error metadata may be retained for debugging purposes
• No persistent storage of patient data is maintained by the Service Provider

All primary data remains under the control of Client systems and APIs.

---

4. DATA VISIBILITY DURING AUTOMATION

The Client acknowledges that:

• Data may be temporarily visible within automated browser sessions during workflow execution
• This visibility is required for completing UI-based automation tasks
• Such visibility does not constitute data retention by the Service Provider

---

5. SECURITY PRACTICES

The Service Provider will apply reasonable safeguards, including:

• Secure handling of credentials
• Controlled script execution practices
• Avoidance of PHI exposure in logs
• Minimal data handling principles

---

6. INCIDENT HANDLING

In the event of a suspected data issue:

• The Client will be informed promptly
• The Service Provider will assist in investigation and resolution
• Reasonable corrective steps will be taken as needed

---

7. INFRASTRUCTURE RESPONSIBILITY

The Client acknowledges:

• Automation systems run entirely on Client-provided virtual machines
• The Client is responsible for infrastructure security, access control, and hosting environment
• The Service Provider does not operate or control production hosting environments

---

8. TERMINATION

Upon termination:

• Automation access may be disabled
• No further data processing will occur by the Service Provider
• The Client retains full operational control of existing systems

---

9. ACCEPTANCE
