BUSINESS ASSOCIATE AGREEMENT (BAA)

This Business Associate Agreement ("Agreement") is entered into between:

Client (Covered Entity):
_____

Authorized Representative:
_____

AND

Service Provider:
Muhammad Umer
(EaseWorkflow)

Effective Date: _____

---

1. PURPOSE

This Agreement defines the responsibilities of both parties regarding the handling of Protected Health Information (PHI) in connection with workflow automation services provided to the Client.

The objective of this Agreement is to support secure, reliable, and compliant operation of automation workflows used within the Client's healthcare environment.

This Agreement applies to all current and future services involving processing of Protected Health Information provided by the Business Associate.

---

2. NATURE OF DATA ACCESS

The Business Associate may process operational healthcare-related data received via Client-approved APIs for the purpose of executing automated workflows.

During automation execution:

• Data may be temporarily displayed within automated browser sessions (e.g., form filling via Selenium)
• Data is processed in real time to complete workflow actions
• No intentional long-term storage of PHI is maintained by the Business Associate

All processing occurs within infrastructure controlled and provided by the Client.

---

3. PERMITTED USE

The Business Associate may access and process PHI solely for:

• Executing automated workflows
• Updating appointment or patient-related statuses
• Performing system-integrated operations as instructed by the Client
• Troubleshooting workflow execution issues

No use of PHI is permitted outside the scope of Client-authorized operations.

---

4. DATA HANDLING AND MINIMIZATION

To reduce exposure and support data protection:

• Data is processed in temporary runtime environments only
• Temporary processing files may be created during execution
• Such files are automatically cleared after successful processing
• Only minimal non-sensitive error metadata is retained for debugging purposes (no PHI included)

The Business Associate does not maintain a persistent patient database.

---

5. SAFEGUARDS

The Business Associate agrees to implement reasonable safeguards, including:

• Secure handling of API credentials
• Restricted system access
• Controlled execution environment (Client VM)
• Avoidance of PHI exposure in logs or debugging output
• Use of automation practices that minimize unnecessary data retention

---

6. INCIDENT NOTIFICATION

If the Business Associate becomes aware of any unauthorized access or data incident related to the automation systems:

• The Client will be notified without unreasonable delay
• Reasonable assistance will be provided for investigation and mitigation

---

7. CLIENT SYSTEM ENVIRONMENT

The Client acknowledges that:

• All automation runs on Client-provided virtual machines
• The Client controls hosting, execution, and environment security
• The Business Associate does not operate or host production environments containing PHI

---

8. TERMINATION

Upon termination of services:

• Access credentials will be revoked
• Any temporary processing artifacts will no longer be generated
• The Client retains continued operational use of deployed systems

---

9. COMPLIANCE INTENT

Both parties intend to handle PHI in a manner consistent with applicable healthcare privacy and security practices, including HIPAA-aligned operational safeguards.

10. ACCEPTANCE
